

# Q1 2020 RESULTS

FINANCIAL AND OPERATING RESULTS FOR THE  
THREE MONTHS ENDED MARCH 31, 2020

## HIGHLIGHTS

- Drilled, completed and tied-in a second Montney well at Two Rivers.
- Completed construction of the Two Rivers facility and commenced production of the two Montney wells.
- Subsequent to March 31, 2020, disposed of certain non-core facility assets for proceeds of \$2.2 million.

FINANCIAL RESULTS (\$000s, except per share amounts)	THREE MONTHS ENDED MARCH 31		
	2020	2019	% Change

(1) Adjusted funds flow and adjusted funds flow per share do not have any standardized meaning prescribed by International Financial Reporting Standards ("IFRS") and therefore may not be comparable to similar measures used by other companies. Please refer to the "Non-GAAP Measures" section in the MD&A for more details and the "Cash Flow from Operations and Adjusted Funds Flow" section in the MD&A for a reconciliation from cash flow from operating activities.

(2) The sale of equipment for proceeds of \$3.1 million in Q1 2019 is exclusive of \$2.7 million deposit received in Q4 2018.

(1) "bbls" refers to barrels, "mcf" refers to thousand cubic feet, and "boe" refers to barrel of oil equivalent. Disclosure provided herein in respect of a boe may be misleading, particularly if used in isolation. A boe conversion rate of six thousand cubic feet of natural gas to one barrel of oil equivalent has been used for the calculation of boe amounts in the MD&A. This boe conversion rate is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

(2) Net operating expenses, net transportation and marketing expenses and operating netback do not have any standardized meaning prescribed by IFRS and therefore may not be comparable to similar measures used by other companies. Please refer to the "Non-GAAP Measures" section in the MD&A for more details and the "Net Operating Expenses", "Net Transportation and Marketing Expenses" and "Operating Netback" sections in the MD&A for reconciliations from operating expenses, transportation and marketing expenses, and net (loss) earnings per boe, respectively.

(3) Includes \$0.59/mcf of unutilized firm transportation expenses for Q1 2020.

## MANAGEMENT'S DISCUSSION AND ANALYSIS ("MD&A")

May 26, 2020

The MD&A should be read in conjunction with the unaudited condensed interim financial statements and related notes for the three months ended March 31, 2020 and the audited financial statements and MD&A for the year ended December 31, 2019. The unaudited condensed interim financial statements and financial data contained in the MD&A have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). All dollar amounts are expressed in Canadian currency, unless otherwise noted.

### DESCRIPTION OF BUSINESS

Leucrotta Exploration Inc. ("Leucrotta" or the "Company") is an oil and natural gas company, actively engaged in the acquisition, development, exploration, and production of oil and natural gas reserves in northeastern British Columbia, Canada. The Company trades on the TSX Venture Exchange ("TSXV") under the symbol "LXE".

### FREQUENTLY RECURRING TERMS

The Company uses the following frequently recurring industry terms in the MD&A: "bbls" refers to barrels, "mcf" refers to thousand cubic feet, and "boe" refers to barrel of oil equivalent. Disclosure provided herein in respect of a boe may be misleading, particularly if used in isolation. A boe conversion rate of six thousand cubic feet of natural gas to one barrel of oil equivalent has been used for the calculation of boe amounts in the MD&A. This boe conversion rate is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead.

### NON-GAAP MEASURES

This MD&A refers to certain financial measures that are not determined in accordance with IFRS (or "GAAP"). This MD&A contains the terms "adjusted funds flow", "adjusted funds flow per share", "operating netback", "net operating expenses", and "net transportation and marketing expenses" which do not have any standardized meaning prescribed by GAAP and therefore may not be comparable to similar measures used by other companies. The Company uses these measures to help evaluate its performance.

Management uses adjusted funds flow to analyze performance and considers it a key measure as it demonstrates the Company's ability to generate the cash necessary to fund future capital investments and abandonment obligations and to repay debt, if any. Adjusted funds flow is a non-GAAP measure and has been defined by the Company as cash flow from operating activities excluding the change in non-cash working capital related to operating activities and expenditures on decommissioning obligations. The Company also presents adjusted funds flow per share whereby amounts per share are calculated using weighted average shares outstanding, consistent with the calculation of net earnings (loss) per share. Adjusted funds flow is reconciled from cash flow from operating activities under the heading "Cash Flow from Operations and Adjusted Funds Flow".

Management considers operating netback an important measure as it demonstrates its profitability relative to current commodity prices. Operating netback, which is calculated as average unit sales price less royalties, net operating expenses, and net transportation and marketing expenses, represents the cash margin for every barrel of oil equivalent sold. Operating netback per boe is reconciled to net (loss) earnings per boe under the heading "Operating Netback".

Net operating expenses is calculated as operating expenses less processing revenues. Management uses net operating expenses to determine the current periods' cash cost of operating expenses less processing revenue and net operating expenses per boe is used to measure operating efficiency on a comparative basis. The measure approximates the Company's operating expenses relative to its produced volumes by excluding third party operating costs.

Net transportation and marketing expenses is calculated as transportation expenses less marketing revenues. Management uses net transportation and marketing expenses to determine the current periods' cash cost of transportation expenses less marketing revenue and net transportation and marketing expenses per boe is used to measure transportation efficiency on a comparative basis as well as the Company's ability to mitigate the cost of excess committed capacity.

### UPDATE

In Q1 2020, Leucrotta's capital was spent primarily on the Two Rivers facility and drilling and completing a second Montney well. \$6.0 million was reclassified as assets held for sale relating to funds received subsequent to the end of Q1 2020 as part of a prior agreement with our partner at Two Rivers.

Production remained relatively stable at 2,921 boe/d for the quarter as wells continue to outperform expectations. Production increased in late March with the start-up of the Two Rivers facility and is estimated to average approximately 3,000 boe/d for 2020.

Leucrotta had \$5.2 million of debt at the end of Q1 2020 and will look to reduce this through 2020 by eliminating all discretionary capital and continuing to sell non-core assets and equipment. In Q2 2020, Leucrotta sold a non-core disposal well for \$2.2 million as part of ongoing initiatives to maintain balance sheet strength.

We look forward to reporting on further business developments in the near future.

**SUMMARY OF FINANCIAL RESULTS**

(\$000s, except per share amounts)	Three Months Ended March 31		
	2020	2019	% Change
<b>Oil and natural gas sales</b>	<b>5,791</b>	8,102	(29)
<b>Cash flow from operating activities</b>	<b>1,405</b>	3,729	(62)
Per share - basic and diluted	<b>0.01</b>	0.02	(50)
<b>Adjusted funds flow</b>	<b>760</b>	4,108	(81)
Per share - basic and diluted	-	0.02	(100)
<b>Net (loss) earnings</b>	<b>(89,444)</b>	2,674	(3,445)
Per share - basic and diluted	<b>(0.45)</b>	0.01	(4,600)
<b>Total assets</b>	<b>230,637</b>	316,865	(27)
<b>Total long-term liabilities</b>	<b>11,561</b>	10,613	9
<b>Working capital (deficiency)</b>	<b>(5,223)</b>	2,675	(295)

The Company experienced a decrease in oil and natural gas sales, cash flow from operating activities, and adjusted funds flow for the first quarter of 2020 compared to the same period in 2019. This was due to significant commodity price declines, higher net operating expenses and higher net transportation and marketing expenses (see discussion below).

Along with decreased cash flow from operating activities, the large net loss in Q1 2020 was due to the impairment of \$87.9 million of the Company's property, plant, and equipment.

**PRODUCTION**

	Three Months Ended March 31		
	2020	2019	% Change
Average Daily Production			
Oil and NGLs (bbls/d)	<b>862</b>	824	5
Natural gas (mcf/d)	<b>12,354</b>	14,049	(12)
Combined (boe/d)	<b>2,921</b>	3,166	(8)

Daily production for the first quarter of 2020 decreased to 2,921 boe/d from 3,166 boe/d for the comparative quarter in 2019. The decrease in production was the result of natural declines partially offset by new production from two wells placed on production in Two Rivers, BC.

Leucrotta's production profile for the first quarter of 2020 shifted slightly in favour of oil and NGLs from the comparative quarter in 2019. The Q1 2020 weighting was 70% natural gas (Q1 2019 - 74%) and 30% oil and NGLs (Q1 2019 - 26%). The increased oil and NGLs weighting was the result of the new oil wells brought on production since Q1 2019 in Mica, BC and Two Rivers, BC.

**OIL AND NATURAL GAS SALES**

(\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Oil and NGLs	<b>3,062</b>	3,846	(20)
Natural gas	<b>2,729</b>	4,256	(36)
Total	<b>5,791</b>	8,102	(29)
Average Sales Price			
Oil and NGLs (\$/bbl)	<b>39.02</b>	51.84	(25)
Natural gas production sales and transportation revenue (\$/mcf)	<b>2.43</b>	3.37	(28)
Combined (\$/boe)	<b>21.78</b>	28.44	(23)

Revenue totaled \$5.8 million for the first quarter of 2020, down 29% from \$8.1 million for the comparative quarter in 2019. The decrease was due to the large declines in oil, NGLs, and natural gas commodity prices and slight production declines.

**PROCESSING AND MARKETING REVENUE**

(\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Processing revenue	<b>94</b>	164	(43)
Marketing revenue	-	125	(100)
Total	<b>94</b>	289	(67)

Processing revenue relates to fees received from third parties for gas processed through the Company's gas plant. Marketing revenue relates to unutilized firm transportation assigned to third parties for a contracted fee in which the Company receives a premium.

The following table outlines the Company's realized wellhead prices and industry benchmarks:

Commodity Pricing	Three Months Ended March 31		
	2020	2019	% Change
<b>Oil and NGLs</b>			
Corporate price (\$CDN/bbl)	39.02	51.84	(25)
Canadian light sweet (\$CDN/bbl)	52.02	66.92	(22)
West Texas Intermediate (\$US/bbl)	46.17	54.81	(16)
<b>Natural gas</b>			
Corporate price (\$CDN/mcf)	2.43	3.37	(28)
AECO price (\$CDN/mcf)	2.03	2.62	(23)
Chicago City Gate (\$US/mmbtu)	1.74	3.04	(43)
<b>Exchange rate</b>			
CDN/US dollar average exchange rate	0.7449	0.7522	(1)

Differences between corporate and benchmark prices can be the result of quality differences (higher or lower API oil and higher or lower heat content natural gas), sour content, the mix of sales points and marketing contracts negotiated for products, the mix of oil and NGLs, and various other factors. Leucrotta's differences are mainly the result of a higher proportion of lower priced NGLs and higher heat content natural gas production that is priced higher than AECO reference prices as well as the diversification of sales points and marketing contracts for products.

The Company's corporate average oil and NGLs prices were 75.0% of Canadian light sweet prices for the first quarter of 2020, consistent with 77.5% for the comparative quarter in 2019. Leucrotta's liquids mix during the first quarter of 2019 was approximately 77% oil, condensate and pentanes, 3% butane and 20% propane (Q1 2019 - 64% oil, condensate and pentanes, 12% butane and 24% propane). The large increase in oil, condensate and pentanes was due to flush production in Two Rivers, BC.

Corporate average natural gas prices were 119.7% of AECO price for the first quarter of 2020, down from 128.6% for the comparative quarter in 2019. The decrease in Q1 2020 from Q1 2019 was mainly due to the large spread between Chicago prices and AECO prices in Q1 2019 compared to Q1 2020. In Q1 2019, the Company received Chicago indexed pricing on the first 7,000 mcf/d, AECO pricing plus \$0.31/mcf on the next 6,000 mcf/d, and ATP pricing on production above this in the Doe/Mica core area. In Q1 2020, the Company received Chicago indexed pricing on all its natural gas production.

Future prices received from the sale of the products may fluctuate as a result of market factors. In addition, the Company may enter into commodity price contracts to help manage future cash flows. The Company does not currently have any commodity price contracts outstanding.

ROYALTIES (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Oil and NGLs	68	-	100
Natural gas	13	-	100
Total	81	-	100
<b>Average Royalty Rate (% of sales)</b>			
Oil and NGLs	2.2	-	100
Natural gas	0.5	-	100
Combined	1.4	-	100

The Company pays royalties to provincial governments (Crown). Crown royalties are calculated on a sliding scale based on commodity prices and individual well production rates. Royalty rates can change due to commodity price fluctuations and changes in production volumes on a well-by-well basis, subject to a minimum and maximum rate restriction ascribed by the Crown. The provincial government has also enacted various royalty incentive programs that are available for wells that meet certain criteria, such as natural gas deep drilling, which can result in fluctuations in royalty rates.

During the three months ended March 31, 2020, royalties were \$0.1 million (March 31, 2019 - \$nil).

During the three months ended March 31, 2020, the Company realized credits of \$0.1 million (March 31, 2019 - \$0.6 million) to offset royalties otherwise payable. These credits stem from the British Columbia Government's Infrastructure Royalty Credit Program resulting from infrastructure built and wells drilled and tied-into the related infrastructure and the Company currently has \$0.6 million of credits remaining.

Further credits to reduce royalties are expected in the future as royalties continue to be payable on wells already tied-into completed and approved infrastructure projects and as new infrastructure is built and wells are drilled and tied-into related infrastructure that was approved for credits under the program and become royalty payable. The timing of receipt of future credits is dependent on commodity prices and production levels and thus cannot be readily forecast; correspondingly, royalty rates reported in future quarters will vary, likely materially,

as these credits are recognized. This credit program is in addition to BC's Natural Gas Deep Well Royalty Credit Program where the Company currently has \$1.2 million in remaining royalty credits.

NET OPERATING EXPENSES (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Oil and NGLs	780	473	65
Natural gas	1,068	1,115	(4)
Operating expenses	1,848	1,588	16
Less: processing revenue	(94)	(164)	(43)
Net operating expenses (non-GAAP)	1,754	1,424	23
Average net operating expenses			
Oil and NGLs (\$/bbl)	9.95	6.37	56
Natural gas (\$/mcf)	0.87	0.75	16
Combined (\$/boe)	6.60	5.00	32

Per unit net operating expenses have increased to \$6.60/boe in Q1 2020 from \$5.00/boe in Q1 2019. The increase is mainly the result of higher costs associated with new oil wells. Mica 13-07 was brought back on production during Q2 2019 and the Two Rivers wells were brought on production during Q1 2020 and had high initial start-up costs.

NET TRANSPORTATION AND MARKETING EXPENSES (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Oil and NGLs transportation	115	112	3
Natural gas transportation	2,005	1,365	47
Transportation and marketing expenses	2,120	1,477	44
Less: marketing revenue	-	(125)	(100)
Net transportation and marketing expenses (non-GAAP)	2,120	1,352	57
Average net transportation and marketing expenses			
Oil and NGLs (\$/bbl)	1.46	1.51	(3)
Natural gas (\$/mcf)	1.78	0.98	82
Combined (\$/boe)	7.97	4.74	68

Net transportation and marketing expenses are mainly third-party pipeline tariffs from firm transportation agreements to deliver production to the purchasers at main hubs. Net transportation and marketing expenses increased to \$7.97/boe for the three months ended March 31, 2020 compared to \$4.74/boe for the comparative period in 2019.

The significant increase in natural gas transportation in the first quarter of 2020 compared to the same quarter in 2019 was due to \$0.7 million of unutilized firm gas transportation (\$0.59/mcf of gas production or \$2.51/boe of total production). Also, the Company transported all of its natural gas production to Chicago in Q1 2020 compared to only a portion in Q1 2019.

The Company currently has commitments of 27.0 mmcf/d escalating to 33.3 mmcf/d in November 2020 of firm transportation to deliver natural gas to the Alliance Trading Pool (ATP) through October 31, 2021. The Company has also committed to 14.2 mmcf/d of firm transportation to deliver natural gas to Chicago through October 31, 2024.

OPERATING NETBACK	Three Months Ended March 31		
	2020	2019	% Change
<b>Oil and NGLs (\$/bbl)</b>			
Revenue	39.02	51.84	(25)
Royalties	(0.87)	-	100
Net operating expenses	(9.95)	(6.37)	56
Net transportation and marketing expenses	(1.46)	(1.51)	(3)
Operating netback	26.74	43.96	(39)
<b>Natural gas (\$/mcf)</b>			
Revenue	2.43	3.37	(28)
Royalties	(0.01)	-	100
Net operating expenses	(0.87)	(0.75)	16
Net transportation and marketing expenses	(1.78)	(0.98)	82
Operating netback	(0.23)	1.64	(114)
<b>Combined (\$/boe)</b>			
Revenue	21.78	28.44	(23)
Royalties	(0.31)	-	100
Net operating expenses	(6.60)	(5.00)	32
Net transportation and marketing expenses	(7.97)	(4.74)	68
Operating netback	6.90	18.70	(63)

During the first quarter of 2020, Leucrotta generated an operating netback of \$6.90/boe, down significantly from \$18.70/boe in the first quarter of 2019 due to lower commodity pricing and higher net operating expenses and net transportation and marketing expenses. Oil, NGLs and natural gas commodity prices weakened a combined 23% in Q1 2020 from the comparative period in 2019. Net operating expenses increased due to higher costs associated with new oil wells in Mica, BC and Two Rivers, BC. Net transportation and marketing expenses increased due to transporting all of the Company's natural gas production to Chicago and not being able to mitigate its unutilized firm natural gas transportation. The cost of unutilized firm natural gas transportation was \$0.59/mcf in Q1 2020.

The following is a reconciliation of operating netback per boe to net earnings (loss) per boe for the periods noted:

(\$/boe)	Three Months Ended March 31		
	2020	2019	% Change
<b>Operating netback</b>	<b>6.90</b>	18.70	(63)
Depletion and depreciation	(8.40)	(9.58)	(12)
Asset impairment	(330.59)	-	100
General and administrative expenses	(3.97)	(4.10)	(3)
Share based compensation	(0.14)	(0.75)	(81)
Gain on sale of equipment	-	5.46	(100)
Finance expense	(0.26)	(0.35)	(26)
<b>Net (loss) earnings</b>	<b>(336.46)</b>	9.38	(3,687)

DEPLETION AND DEPRECIATION	Three Months Ended March 31		
	2020	2019	% Change
Depletion and depreciation (\$000s)	2,233	2,728	(18)
Depletion and depreciation (\$/boe)	8.40	9.58	(12)

The Company calculates depletion on property, plant, and equipment mainly based on proved plus probable reserves.

Included in depletion and depreciation expense for the three months ended March 31, 2020, is \$22 thousand (March 31, 2019 - \$22 thousand) related to the right-of-use asset for the Company's head office lease and \$nil (March 31, 2019 - \$63 thousand) related to lease expiries.

#### IMPAIRMENT OF PROPERTY, PLANT, AND EQUIPMENT

At March 31, 2020, the Company evaluated its property, plant, and equipment ("PP&E") Montney CGU for indicators of impairment. Effective January 1, 2020, the Company consolidated its two CGUs into one CGU (the "Montney CGU") to reflect the operations of Leucrotta's current asset base. Indicators of impairment were determined to exist in the Company's sole Montney CGU primarily as a result of significant and sustained decline in forward commodity benchmark prices for oil, natural gas and NGLs and a sustained market capitalization deficiency relative to the book value of the Company's shareholders' equity.

The recoverable amount of the Company's Montney CGU, comprised of primarily natural gas and natural gas liquids reserves, was determined using the value in use methodology based on the net present value of cash flows from oil and natural gas reserves at pre-tax discount rates ranging from 10 to 17.5 percent depending on the underlying composition and risk profile of the reserve category. At March 31, 2020, the Company determined that the carrying amount of the Company's Montney CGU exceeded the recoverable amount, net of

associated decommissioning obligations, of \$86.5 million and accordingly, an impairment charge of \$84.8 million was recorded. An additional \$2.4 million of impairment was recorded prior to the transfer of certain assets from exploration and evaluation assets to PP&E and an additional \$0.7 million of impairment was recorded upon transfer of certain assets to assets held for sale for a total impairment expense of \$87.9 million for the three months ended March 31, 2020.

At March 31, 2019, the Company evaluated its CGUs for indicators of impairment or impairment reversals and determined an impairment test was not required.

GENERAL AND ADMINISTRATIVE (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
G&A expenses (gross)	1,217	1,265	(4)
G&A capitalized	(160)	(97)	65
G&A recoveries	(1)	(1)	-
G&A expenses (net)	1,056	1,167	(10)
G&A expenses (\$/boe)	3.97	4.10	(3)

General and administrative ("G&A") expenses were \$3.97/boe for the first quarter of 2020, consistent with \$4.10/boe for the first quarter of 2019.

SHARE BASED COMPENSATION	Three Months Ended March 31		
	2020	2019	% Change
Share based compensation (\$000s)	38	213	(82)
Share based compensation (\$/boe)	0.14	0.75	(81)

The Company accounts for its share based compensation plans using the fair value method. Under this method, compensation cost is charged to earnings over the vesting period for stock options and warrants granted to officers, directors, employees, and consultants with a corresponding increase to contributed surplus.

Share based compensation expense decreased to \$38 thousand (\$0.14/boe) in Q1 2020 from \$0.2 million (\$0.75/boe) for the comparative quarter in 2019. The decrease in expense is mainly due to using the graded (accelerated) amortization method whereby more expense is recognized earlier in the stock options and warrants life. 45 thousand stock options were granted in Q1 2020 (March 31, 2019 – nil).

FINANCE EXPENSE (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Interest expense	20	51	(61)
Accretion of decommissioning obligations	50	50	-
Finance expense	70	101	(31)
Finance expense (\$/boe)	0.26	0.35	(26)

Interest expense includes interest payments on the credit facility and the interest expense on lease obligations. Interest decreased during the three months ended March 31, 2020 compared to the same period in 2019 due to the Company drawing more on the credit facility in Q1 2019, prior to receiving proceeds on the sale of equipment to pay down the credit facility.

Accretion expense remained consistent for the three months ended March 31, 2020 compared to the same period in 2019.

#### DEFERRED INCOME TAXES

The Company has not realized the net deferred income tax asset based on the independently evaluated reserve report as cash flows are not expected to be sufficient to realize the deferred income tax asset at this time.

Estimated tax pools at March 31, 2020 total approximately \$334.2 million (December 31, 2019 - \$322.8 million).

#### CASH FLOW FROM OPERATIONS AND ADJUSTED FUNDS FLOW

The following is a reconciliation of cash flow from operating activities to adjusted funds flow for the periods noted:

(\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Cash flow from operating activities	1,405	3,729	(62)
Add back:			
Decommissioning expenditures	69	30	130
Change in non-cash working capital	(714)	349	(305)
Adjusted funds flow (non-GAAP)	760	4,108	(81)

Adjusted funds flow for the first quarter of 2020 was \$0.8 million (\$nil per basic and diluted share) compared to \$4.1 million (\$0.02 per basic and diluted share) for the comparative quarter in 2019. The decrease was mainly due to lower commodity pricing and higher net operating expenses and net transportation and marketing expenses. Oil, NGLs and natural gas commodity prices weakened a combined 23% in Q1 2020 from the comparative period in 2019. Net operating expenses increased due to higher costs associated with new oil wells in Mica, BC and Two Rivers, BC. Net transportation and marketing expenses increased due to transporting all of the Company's natural gas production to Chicago and not being able to mitigate its unutilized firm natural gas transportation.

Cash flow from operations decreased for the three months ended March 31, 2020 to \$1.4 million (\$0.01 per basic and diluted share) from \$3.7 million (\$0.02 per basic and diluted share) for the comparative period in 2019. The decrease period over period is due to similar reasons as stated above. Cash flow from operating activities differs from adjusted funds flow due to the inclusion of changes in non-cash working capital and expenditures on decommissioning obligations.

## NET (LOSS) EARNINGS

Net loss for the three months ended March 31, 2020 was \$89.4 million (\$0.45 per basic and diluted share), compared to net earnings of \$2.7 million (\$0.01 per basic and diluted share) for the comparative period in 2019. Along with decreased cash flow from operating activities, the large net loss in Q1 2020 was due to the impairment of \$87.9 million of the Company's property, plant, and equipment.

CAPITAL EXPENDITURES (\$000s)	Three Months Ended March 31		
	2020	2019	% Change
Land	440	249	77
Drilling, completions, and workovers	5,742	2,847	102
Equipment	5,778	1,748	231
Geological and geophysical	52	110	(53)
<b>Total expenditures</b>	<b>12,012</b>	<b>4,954</b>	<b>142</b>
Proceeds on sale of equipment	-	3,142	(100)

In Q1 2020, the Company drilled, completed and tied-in a second Montney well at Two Rivers. The Company also completed construction of the Two Rivers facility near the end of Q1 2020 and commenced production of two Montney wells (B16-05 drilled and completed in Q1 2020 and A10-08 drilled and completed in Q4 2017). Subsequent to March 31, 2020, the Company received proceeds of \$6.0 million from a third party related to the Two Rivers property and lands. At March 31, 2020, the net carrying value of the effected properties was classified as held for sale as it was highly probable that their net carrying value would be recovered through a sales transaction.

In Q1 2019, the Company drilled an exploratory well in a zone below the Lower Montney zone in Mica, BC. The Company also completed its sale of certain equipment for proceeds of \$5.9 million (deposit of \$2.7 million was received in Q4 2018 and the remainder in Q1 2019) resulting in a gain on the sale of equipment of \$1.6 million.

## LIQUIDITY AND CAPITAL RESOURCES

Management uses working capital as a measure to assess the Company's financial position and is reconciled as follows:

(\$000s)	March 31, 2020	December 31, 2019	% Change
Current assets	9,672	3,728	159
Less:			
Current liabilities	(14,895)	(3,603)	313
<b>Working capital (deficiency)</b>	<b>(5,223)</b>	<b>125</b>	<b>(4,278)</b>

At March 31, 2020, the Company had a working capital deficiency of \$5.2 million including \$1.1 million drawn on the credit facility.

The Company has a \$20.0 million operating demand loan credit facility with a Canadian chartered bank. To access the credit facility over \$15.0 million requires entering into and maintaining forward commodity price contracts of no less than 50% of production volumes for the first 12 months and no less than 25% of production volumes for the following 12 months thereafter. The credit facility bears interest at prime plus a range of 0.50% to 2.50% and is secured by a \$100 million fixed and floating charge debenture on the assets of the Company. The undrawn portion of the credit facility is subject to a standby fee in the range of 0.20% to 0.45%. At March 31, 2020, the Company had outstanding letters of guarantee of \$4.8 million which reduce the amount that can be borrowed under the credit facility. The next review of the credit facility by the bank is scheduled on or before May 31, 2020. As the available lending limits are based on the lender's interpretation of the Company's reserves and future commodity prices, there can be no assurance as to the amount of available credit that will be determined at each scheduled review. In the event that the credit facility limit is reduced and the amount outstanding exceeds the new credit facility limit, any shortfall shall become immediately due and payable.

The Company's credit facility includes a covenant requiring the Company to maintain an adjusted working capital ratio of not less than one-to-one. The working capital ratio, as defined by its creditor, is calculated as current assets plus any undrawn amounts available on its credit facility less current liabilities excluding any current portion drawn on the credit facility. The Company was compliant with this covenant at March 31, 2020.

The Company has \$1.4 million in a restricted corporate account to cross-guarantee a margin account for the President of the Company. The President is charged a fee by the Company and the margin account is also restricted until the cross-guarantee is removed. The President's margin account currently holds \$1.6 million of securities of Leucrotta common shares and a margin payable of \$1.4 million. (March 31, 2020 - \$0.8 million of securities and \$1.4 million margin payable, respectively). The cross-guarantee is not intended to be long-term in nature and will be removed as soon as practicable. The cross-guarantee has allowed the President to comply with corporate governance mandates. The \$1.4 million has been segregated on the statement of financial position as restricted cash at March 31, 2020 (December 31, 2019 - \$1.3 million).

Management anticipates that the Company will continue to have adequate liquidity to fund budgeted capital investments through a combination of its cash flow, equity, and debt if required. Leucrotta's capital program is flexible and can be adjusted as needed based upon the current economic environment. The Company will continue to monitor the economic environment and the possible impact on its business and strategy and will make adjustments as necessary. Capital spending will be limited on a go-forward basis until there is more

clarity on commodity prices. Leucrotta will look to reduce debt through cash flow and sale of non-core properties and equipment. Subsequent to March 31, 2020, the Company disposed of certain non-core facility assets for proceeds of \$2.2 million.

## CONTRACTUAL OBLIGATIONS

The following is a summary of the Company's contractual obligations and commitments at March 31, 2020:

(\$000s)	Total	Less than One Year	One to Three Years	After Three Years
Accounts payable and accrued liabilities	13,733	13,733	-	-
Credit facility	1,071	1,071	-	-
Lease obligations	146	91	55	-
Decommissioning obligations	11,506	-	-	11,506
Operating leases	354	224	130	-
Firm transportation agreements	28,694	10,519	15,922	2,253
<b>Total contractual obligations</b>	<b>55,504</b>	<b>25,638</b>	<b>16,107</b>	<b>13,759</b>

Transportation commitments include contracts to transport natural gas and NGLs through third-party owned pipeline systems. The Company currently has commitments of 27.0 mmcf/d escalating to 33.3 mmcf/d in November 2020 of firm transportation to deliver natural gas to the Alliance Trading Pool (ATP) through October 31, 2021. The Company has also committed to 14.2 mmcf/d of firm transportation to deliver natural gas to Chicago through October 31, 2024.

Operating leases include the non-lease variable components of the head office lease.

## OFF BALANCE SHEET ARRANGEMENTS

The Company has certain lease arrangements, all of which are reflected in the contractual obligations and commitments table, which were entered into in the normal course of operations. All leases other than the fixed payment component of the head office lease have been treated as operating leases whereby the lease payments are included in operating expenses or general and administrative expenses depending on the nature of the lease.

## OUTSTANDING SHARE DATA

The Company is authorized to issue an unlimited number of voting common shares, an unlimited number of non-voting common shares, Class A preferred shares, issuable in series, and Class B preferred shares, issuable in series. The voting common shares of the Company commenced trading on the TSXV on August 19, 2014 under the symbol "LXE". The following table summarizes the common shares outstanding and the number of shares exercisable into common shares from options, warrants, and other instruments:

(000s)	March 31, 2020	May 26, 2020
Voting common shares	200,525	200,525
Warrants	14,865	14,865
Stock options	11,002	11,002
<b>Total</b>	<b>226,392</b>	<b>226,392</b>

## SUMMARY OF QUARTERLY RESULTS

	Q1 2020	Q4 2019	Q3 2019	Q2 2019	Q1 2019	Q4 2018 <sup>(1)</sup>	Q3 2018 <sup>(1)</sup>	Q2 2018 <sup>(1)</sup>
Average Daily Production								
Oil and NGLs (bbls/d)	862	765	829	861	824	850	888	938
Natural gas (mcf/d)	12,354	12,392	13,414	13,550	14,049	14,115	14,724	15,297
Combined (boe/d)	2,921	2,830	3,065	3,119	3,166	3,202	3,342	3,487
(\$000s, except per share amounts)								
Oil and natural gas sales	5,791	6,870	6,113	6,560	8,102	7,113	7,182	7,327
Cash flow from operating activities	1,405	2,098	950	3,688	3,729	3,764	1,975	4,579
Per share - basic and diluted	0.01	0.01	-	0.02	0.02	0.02	0.01	0.02

Per share - basic and diluted	(0.45)	(0.03)	(0.01)	(-)	0.01	(-)	(-)	(0.01)

(1) IFRS 16 was adopted January 1, 2019 using the modified retrospective approach; therefore, comparative information has not been restated. Refer to note 3 of the audited financial statements for the year ended December 31, 2019 for the Company's significant accounting policies.

Production has decreased in each quarter of 2018 and 2019 due to natural declines. Oil and natural gas sales, cash flow from operating activities and adjusted funds flow generally followed the same trend as production with some exceptions based on volatility of commodity

prices received. The large loss in Q2 2018 was the result of non-cash share based compensation expense related to the expiry term extension of existing stock options, performance warrants and purchase warrants. The higher net earnings in Q1 2019 from Q4 2018 was mainly the result of a \$1.6 million gain on the sale of equipment and higher oil, NGLs and natural gas commodity pricing. The increased net losses in Q4 2019 and Q1 2020 were the result of impairment charges of \$5.8 million in Q4 2019 and \$87.9 million in Q1 2020.

## **SIGNIFICANT ACCOUNTING POLICIES**

All accounting policies are consistent with those of the previous financial year with the exception of those noted below. Refer to note 3 of the audited financial statements for the year ended December 31, 2019 for the Company's significant accounting policies.

### **Accounting Pronouncement Adopted**

On January 1, 2020, the Company adopted the amendments to the definition of a business in IFRS 3 Business Combinations. The amendments are intended to provide additional guidance to determine if a transaction should be recorded as a business combination or an asset acquisition. The amendments clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess if an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test. This standard will be applied prospectively. No acquisitions were completed during the three months ended March 31, 2020.

## **CRITICAL ACCOUNTING ESTIMATES**

Management is required to make estimates, judgments, and assumptions in the application of IFRS that affect the reported amounts of assets and liabilities at the date of the financial statements and revenues and expenses for the period then ended. Certain of these estimates may change from period to period resulting in a material impact on the Company's results from operations and financial position. See note 2d in the notes to the Company's audited financial statements for the year ended December 31, 2019 for full descriptions of the use of estimates and judgments.

### **Coronavirus disease (COVID-19) estimation uncertainty**

In early March 2020, the World Health Organization declared the COVID-19 coronavirus outbreak to be a global pandemic. The current and expected impacts on global commerce are anticipated to be far-reaching. To date there have been significant stock market declines and volatility, significant volatility in commodity and foreign exchange markets, restrictions on the conduct of business in many jurisdictions and the global movement of people and some goods have become restricted. There is significant ongoing uncertainty surrounding COVID-19 and the extent and duration of the impacts that it may have on demand and prices for the commodities Leucrotta produces, on its suppliers, on its employees and on global financial markets. The situation is dynamic and the ultimate duration and magnitude of the impact on the economy and the financial effect the Company is not known at this time. Estimates and judgments made by management in the preparation of interim financial statements are subject to a higher degree of measurement uncertainty during this volatile period. In the current environment, assumptions about future commodity prices, exchange rates, and interest rates are subject to greater variability than normal, which could in the future significantly affect the valuation of Leucrotta's assets, both financial and non-financial. As an understanding of the longer-term impacts of COVID-19 on commodity, credit and equity markets develops, there is amplified potential for changes in estimates and judgments over the remainder of 2020.

## **RISK ASSESSMENT**

The acquisition, exploration, and development of oil and natural gas properties involves many risks common to all participants in the oil and natural gas industry. Leucrotta's exploration and development activities are subject to various business risks such as unstable commodity prices, interest rate and foreign exchange fluctuations, the uncertainty of replacing production and reserves on an economic basis, government regulations, taxes, and safety and environmental concerns. While management realizes these risks cannot be eliminated, they are committed to monitoring and mitigating these risks.

### **Reserves and reserve replacement**

The recovery and reserve estimates on Leucrotta's properties are estimates only and the actual reserves may be materially different from that estimated. The estimates of reserve values are based on a number of variables including price forecasts, projected production volumes and future production and capital costs. All of these factors may cause estimates to vary from actual results.

Leucrotta's future oil and natural gas reserves, production, and adjusted funds flow to be derived therefrom are highly dependent on the Company successfully acquiring or discovering new reserves. Without the continual addition of new reserves, any existing reserves the Company may have at any particular time and the production therefrom will decline over time as such existing reserves are exploited. A future increase in Leucrotta's reserves will depend on its abilities to acquire suitable prospects or properties and discover new reserves.

To mitigate this risk, Leucrotta has assembled a team of experienced technical professionals who have expertise operating and exploring in areas the Company has identified as being the most prospective for increasing reserves on an economic basis. To further mitigate reserve replacement risk, Leucrotta has targeted a majority of its prospects in areas which have multi-zone potential, year-round access, and lower drilling costs and employs advanced geological and geophysical techniques to increase the likelihood of finding additional reserves.

### **Operational risks**

Leucrotta's operations are subject to the risks normally incidental to the operation and development of oil and natural gas properties and the drilling of oil and natural gas wells. Continuing production from a property, and to some extent the marketing of production therefrom, are largely dependent upon the ability of the operator of the property.

### **Market risk**

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk is comprised of foreign currency risk, interest rate risk, and other price risk, such as commodity price risk. The objective of

market risk management is to manage and control market price exposures within acceptable limits, while maximizing returns. The Company may use financial derivatives or physical delivery sales contracts to manage market risks. All such transactions are conducted within risk management tolerances that are reviewed by the Board of Directors. As required under the terms of the Company's credit facility, the Company is subject to an upper limit on fixed price contracts of 65% of its future production up to a three year period.

#### *Foreign exchange risk*

The prices received by the Company for the production of oil, natural gas, and NGLs are primarily determined in reference to US dollars, but are settled with the Company in Canadian dollars. The Company's cash flow from commodity sales will therefore be impacted by fluctuations in foreign exchange rates. The Company currently does not have any foreign exchange contracts in place.

#### *Interest rate risk*

The Company is exposed to interest rate risk when it borrows funds at floating interest rates. The Company currently does not use interest rate hedges or fixed interest rate contracts to manage the Company's exposure to interest rate fluctuations. The amount drawn on the Company's credit facility at March 31, 2020 was \$1.1 million.

#### *Commodity price risk*

Oil and natural gas prices are impacted by not only the relationship between the Canadian and US dollar but also by world economic events that dictate the levels of supply and demand. The Company's oil, natural gas, and NGLs production is marketed and sold on the spot market to area aggregators based on daily spot prices that are adjusted for product quality and transportation costs. The Company's cash flow from product sales will therefore be impacted by fluctuations in commodity prices. In addition, the Company may enter into commodity price contracts to manage future cash flows. At March 31, 2020, the Company did not have any commodity price contracts outstanding.

#### **Credit risk**

Credit risk represents the financial loss that the Company would suffer if the Company's counterparties to a financial asset fail to meet or discharge their obligation to the Company. A substantial portion of the Company's accounts receivable and deposits are with customers and joint interest partners in the oil and natural gas industry and are subject to normal industry credit risks. The Company generally grants unsecured credit but routinely assesses the financial strength of its customers and joint interest partners.

The Company sells the majority of its production to three petroleum and natural gas marketers and therefore is subject to concentration risk. Historically, the Company has not experienced any collection issues with its oil and natural gas marketers. Joint interest receivables are typically collected within one to three months of the joint interest billing being issued to the partner. The Company attempts to mitigate the risk from joint interest receivables by obtaining partner approval for significant capital expenditures prior to the expenditure being incurred. The Company does not typically obtain collateral from petroleum and natural gas marketers or joint interest partners; however, in certain circumstances, the Company may cash call a partner in advance of expenditures being incurred.

The maximum exposure to credit risk is represented by the carrying amount of cash and cash equivalents, restricted cash, and accounts receivable on the statement of financial position. At March 31, 2020, \$1.5 million (72%) of the Company's outstanding accounts receivable were current and \$75 thousand (4%) were outstanding for more than 90 days. During the period ended March 31, 2020, the Company deemed \$7 thousand of outstanding accounts receivable to be uncollectable (March 31, 2019 - \$nil).

Cash and cash equivalents and restricted cash consist of bank balances placed with financial institutions with strong investment grade ratings which management believes the risk of loss to be remote.

#### **Liquidity risk**

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company's processes for managing liquidity risk include ensuring, to the extent possible, that it will have sufficient liquidity to meet its liabilities when they become due. The Company prepares annual, quarterly, and monthly capital expenditure budgets, which are monitored and updated as required, and requires authorizations for expenditures on projects to assist with the management of capital. In managing liquidity risk, the Company ensures that it has access to additional financing, including potential equity issuances and additional debt financing. The Company also mitigates liquidity risk by maintaining an insurance program to minimize exposure to insurable losses.

The Company has a working capital deficit of \$5.2 million including \$1.1 million drawn on the \$20.0 million credit facility. To access the credit facility over \$15.0 million requires entering into and maintaining forward commodity price contracts of no less than 50% of production volumes for the first 12 months and no less than 25% of production volumes for the following 12 months thereafter. Management anticipates that the Company will continue to have adequate liquidity to fund budgeted capital investments through a combination of its cash balance, cash flow, equity, and debt if required.

The global impact of COVID-19 as well as the recent declines in spot prices for oil have resulted in significant declines in financial markets and has forecasted a great deal of uncertainty. As a result, oil and gas companies are subject to liquidity risks in maintaining their revenues and earnings as well as ongoing and future development and operating expenditure requirements. These and other factors may adversely affect the Company's liquidity and the Company's ability to generate income and cash flows in the future. In light of the current volatility and difficulty in reliably estimating the length or severity of these developments, and hence their financial impact, the preparation of financial forecasts is challenging. At March 31, 2020, the Company remains in compliance with all terms of its credit facility and based on current available information, management expects to comply with all terms during the subsequent 12-month period. The Company continues to monitor this uncertainty in conjunction with its financing alternatives to access liquidity.

#### **Safety and Environmental Risks**

The oil and natural gas business is subject to extensive regulation pursuant to various municipal, provincial, national, and international conventions and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases, or emissions of various substances produced in association with oil and natural gas operations. Leucrotta is committed to meeting and exceeding its environmental and safety responsibilities. Leucrotta has implemented an environmental and safety policy that is designed,

at a minimum, to comply with current governmental regulations set for the oil and natural gas industry. Changes to governmental regulations are monitored to ensure compliance. Environmental reviews are completed as part of the due diligence process when evaluating acquisitions. Environmental and safety updates are presented and discussed at each Board of Directors meeting. Leucrotta maintains adequate insurance commensurate with industry standards to cover reasonable risks and potential liabilities associated with its activities as well as insurance coverage for officers and directors executing their corporate duties. To the knowledge of management, there are no legal proceedings to which Leucrotta is a party or of which any of its property is the subject matter, nor are any such proceedings known to Leucrotta to be contemplated.

#### **FORWARD-LOOKING INFORMATION**

This document contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words “expect”, “anticipate”, “continue”, “estimate”, “may”, “will”, “should”, “believe”, “intends”, “forecast”, “plans”, “guidance” and similar expressions are intended to identify forward-looking statements or information.

More particularly and without limitation, this MD&A contains forward-looking statements and information relating to the Company’s risk management program, oil, NGLs, and natural gas production, capital programs, and debt. The forward-looking statements and information are based on certain key expectations and assumptions made by the Company, including expectations and assumptions relating to prevailing commodity prices and exchange rates, applicable royalty rates and tax laws, future well production rates, the performance of existing wells, the success of drilling new wells, the availability of capital to undertake planned activities, and the availability and cost of labour and services.

Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, it can give no assurance that such expectations will prove to be correct. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent risks and uncertainties. Actual results may differ materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production, delays or changes in plans with respect to exploration or development projects or capital expenditures, the uncertainty of estimates and projections relating to production rates, costs, and expenses, commodity price and exchange rate fluctuations, marketing and transportation, environmental risks, competition, the ability to access sufficient capital from internal and external sources and changes in tax, royalty, and environmental legislation. The forward-looking statements and information contained in this document are made as of the date hereof for the purpose of providing the readers with the Company’s expectations for the coming year. The forward-looking statements and information may not be appropriate for other purposes. The Company undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws.

#### **ADDITIONAL INFORMATION**

**1. REPORTING ENTITY**

Leucrotta Exploration Inc. ("Leucrotta" or the "Company") is an oil and natural gas company, actively engaged in the acquisition, development, exploration, and production of oil and natural gas reserves in northeastern British Columbia, Canada. Leucrotta was incorporated in Alberta, Canada under the Business Corporations Act (Alberta) on June 10, 2014 under the name of 1828073 Alberta Ltd., and subsequently changed its name to Leucrotta Exploration Inc. on July 15, 2014. The Company commenced trading on the TSX Venture Exchange ("TSXV") on August 19, 2014 under the symbol "LXE".

The Company conducts many of its activities jointly with others and these condensed interim financial statements reflect only the Company's proportionate interest in such activities.

The Company's place of business is located at 700, 639 – 5<sup>th</sup> Avenue SW, Calgary, Alberta, Canada, T2P 0M9.

**2. BASIS OF PRESENTATION**

**(a) Statement of compliance**

These condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of interim financial statements, as prescribed by IAS 34, Interim Financial Reporting. The condensed interim financial statements do not include all of the information and disclosure required in annual financial statements and should be read in conjunction with the audited financial statements and related notes for the year ended December 31, 2019.

The condensed interim financial statements were authorized for issuance by the Board of Directors on May 26, 2020.

**(b) Basis of measurement**

The condensed interim financial statements have been prepared on the historical cost basis.

**(c) Functional and presentation currency**

The condensed interim financial statements are presented in Canadian dollars, which is the functional currency of the Company.

**(d) Use of estimates and judgments**

The preparation of the condensed interim financial statements in conformity with IFRS requires management to make estimates and use judgment regarding the reported amounts of assets and liabilities as at the date of the condensed interim financial statements and the reported amounts of revenues and expenses during the period. By their nature, estimates are subject to measurement uncertainty and changes in such estimates in future periods could require a material change in the interim financial statements. Accordingly, actual results may differ from the estimated amounts as future confirming events occur. The significant estimates and judgments made by management in the preparation of these condensed interim financial statements were consistent with those applied to the financial statements as at and for the year ended December 31, 2019.

Subsequent to December 31, 2019, global oil prices declined considerably caused by reduced demand driven by the novel coronavirus ("COVID-19") health pandemic and over supply concerns stemming from failed negotiations between OPEC+ countries on production curtailments. While the OPEC+ countries have now reached an agreement on production cuts, the macro environment remains weak and considerable uncertainty exists regarding the duration and extent of oil demand destruction from the COVID-19 pandemic. There have also been significant stock market declines, significant volatility in foreign exchange markets, and restrictions on the conduct of business in many jurisdictions. The current challenging economic climate may have significant adverse impacts on the Company, including, but not limited to:

- material declines in revenue and cash flows due to reduced commodity pricing,
- declines in future revenue could result in increased impairment charges to long-term assets,
- increased risk of non-performance by the Company's customers which could materially increase collection risk of accounts receivable and customer defaults on contracts, and
- prolonged demand destruction could negatively impact the Company's ability to maintain liquidity.

The situation is dynamic and the ultimate duration and magnitude of the impact on the economy and the financial effect to the Company is not known at this time. Estimates and judgments made by management in the preparation of these condensed interim financial statements are subject to a higher degree of measurement uncertainty during this volatile period. As an understanding of the longer-term impacts of COVID-19 on commodity, credit and equity markets develops, there is amplified potential for changes in these estimates and judgments over the remainder of 2020.

### 3. SIGNIFICANT ACCOUNTING POLICIES

Except, for the change described below, the condensed interim financial statements have been prepared following the same accounting policies as the annual financial statements for the year ended December 31, 2019. The accounting policies have been applied consistently by the Company to all periods presented in these condensed interim financial statements.

#### Accounting pronouncement adopted

On January 1, 2020, the Company adopted the amendments to the definition of a business in IFRS 3 Business Combinations. The amendments are intended to provide additional guidance to determine if a transaction should be recorded as a business combination or an asset acquisition. The amendments clarify the minimum requirements for a business, remove the assessment of whether market participants are capable of replacing any missing elements, add guidance to help entities assess if an acquired process is substantive, narrow the definitions of a business and of outputs, and introduce an optional fair value concentration test. This standard will be applied prospectively. No acquisitions were completed during the three months ended March 31, 2020.

### 4. ASSETS HELD FOR SALE

	<b>Net Book Value</b>
Balance, December 31, 2018	4,314
Sale of equipment	(4,314)
Balance, December 31, 2019	-
Cost transferred from property, plant, and equipment (note 5)	5,585
Cost transferred from exploration and evaluation assets (note 6)	1,229
Accumulated depreciation, depreciation and impairment transferred from property, plant, and equipment (note 5)	(814)
Balance, March 31, 2020	6,000

Subsequent to March 31, 2020, the Company received proceeds of \$6.0 million from a third party related to the Two Rivers property and lands. At March 31, 2020, the net carrying value of the effected properties was classified as held for sale as it was highly probable that their net carrying value would be recovered through a sales transaction. Management determined the net carrying value of these properties was \$0.7 million higher than the estimated consideration which resulted in the recognition of an impairment loss applied against the carrying value of these properties immediately prior to the \$6.0 million reclassification of assets from property, plant, and equipment and exploration and evaluation assets to assets held for sale on the condensed interim statement of financial position. The sale closed on May 5, 2020.

During the year ended December 31, 2019, the Company sold certain equipment for proceeds of \$5.9 million (USD \$4.4 million) resulting in a gain of \$1.6 million. During the fourth quarter of 2018, the Company received deposits totaling \$2.7 million (USD \$2.0 million) relating to the sale with the remaining balance of \$3.1 million (USD \$2.4 million) received in the first quarter of 2019. The \$2.7 million deposit was recognized in cash with an offsetting amount recognized in accounts payable as at December 31, 2018 and upon the sale closing the deposit was applied to the proceeds and the accounts payable was reversed.

## 5. PROPERTY, PLANT, AND EQUIPMENT

<b>Cost</b>	<b>Total</b>
Balance, December 31, 2018	234,782
Property acquisition	1,556
Additions	8,932
Dispositions	(2,000)
Change in decommissioning obligations	1,566
Initial recognition of right-of-use assets	254
Capitalized share based compensation	52
Balance, December 31, 2019	245,142
Additions	<b>5,782</b>
Transfer from exploration and evaluation assets (note 6)	<b>3,923</b>
Transfer to assets held for sale (note 4)	<b>(5,585)</b>
Change in decommissioning obligations	<b>(666)</b>
Capitalized share based compensation	<b>2</b>
<b>Balance, March 31, 2020</b>	<b>248,598</b>
<b>Accumulated Depletion, Depreciation, and Impairment</b>	
	<b>Total</b>
Balance, December 31, 2018	47,350
Depletion and depreciation	10,558
Impairment	4,750
Dispositions	(258)
Balance, December 31, 2019	62,400
Transfer to assets held for sale (note 4)	<b>(814)</b>
Depletion and depreciation	<b>2,233</b>
Impairment	<b>85,473</b>
<b>Balance, March 31, 2020</b>	<b>149,292</b>
<b>Net Book Value</b>	
	<b>Total</b>
December 31, 2019	182,742
<b>March 31, 2020</b>	<b>99,306</b>

During the three months ended March 31, 2020, \$39 thousand (March 31, 2019 - \$20 thousand) of directly attributable general and administrative costs were capitalized as expenditures on property, plant, and equipment.

Subsequent to March 31, 2020, the Company entered into a purchase and sale agreement and disposed of certain non-core facility assets for proceeds of \$2.2 million.

### Depletion and depreciation

The calculation of depletion and depreciation expense for the three months ended March 31, 2020 included an estimated \$323.1 million (March 31, 2019 - \$329.6 million) for future development costs associated with proved plus probable undeveloped reserves and excluded approximately \$5.1 million (March 31, 2019 - \$3.8 million) for the estimated salvage value of production equipment and facilities.

Included in depletion and depreciation expense for the three months ended March 31, 2020, is \$22 thousand (March 31, 2019 - \$22 thousand) related to the right-of-use asset for the Company's head office lease. As at March 31, 2020, the net book value of this right-of-use asset is \$0.1 million (December 31, 2019 - \$0.2 million).

### Impairment

At March 31, 2020, the Company evaluated its property, plant, and equipment ("PP&E") Montney CGU for indicators of impairment or impairment reversals. Effective January 1, 2020, the Company consolidated its two CGUs into one CGU (the "Montney CGU") to reflect the operations of Leucrotta's current asset base. Indicators of impairment were determined to exist in the Company's sole Montney CGU primarily as a result of significant and sustained decline in forward commodity benchmark prices for oil, natural gas and NGLs and a sustained market capitalization deficiency relative to the book value of the Company's shareholders' equity.

The recoverable amount of the Company's Montney CGU, comprised of primarily natural gas and natural gas liquids reserves, was determined using the value in use methodology based on the net present value of cash flows from oil and natural gas reserves at pre-tax discount rates ranging from 10 to 17.5 percent depending on the underlying composition and risk profile of the reserve category. At March 31, 2020, the Company determined that the carrying amount of the Company's Montney CGU exceeded the recoverable amount, net of associated decommissioning obligations, of \$86.5 million and accordingly, an impairment charge of \$84.8 million was recorded. An additional \$2.4 million of impairment was recorded prior to the transfer of certain assets from exploration and evaluation assets to PP&E and an additional \$0.7 million of impairment was recorded upon transfer of certain assets to assets held for sale for a total impairment expense of \$87.9 million for the three months ended March 31, 2020.

Commodity price estimates based on an average of three independent reserve evaluators used in the impairment calculations as at March 31, 2020 were as follows:

Year	West Texas Intermediate Oil (\$US/bbl)	Foreign Exchange Rate (USD/CDN)	Edmonton Light, Sweet Oil (\$CDN/bbl)	AECO Gas Price (\$CDN/mmbtu)	Chicago Gas Price (\$USD/mmbtu)
2020	29.17	0.707	29.22	1.74	2.01
2021	40.45	0.728	46.85	2.20	2.49
2022	49.17	0.745	59.27	2.37	2.70
2023	53.28	0.747	65.02	2.45	2.77
2024	55.66	0.748	68.43	2.52	2.84
2025	56.87	0.750	69.81	2.60	2.91
2026	58.01	0.750	71.24	2.66	2.97
2027	59.17	0.750	72.70	2.72	3.03
2028	60.35	0.750	74.19	2.79	3.10
2029	61.56	0.750	75.71	2.85	3.16
2030	62.79	0.750	77.22	2.91	3.22
Escalate Thereafter	2.0% per year		2.0% per year	2.0% per year	2.0% per year

The results of impairment tests are sensitive to changes in any of the key estimates of which changes could decrease or increase the recoverable amounts of assets and result in additional impairment charges or recovery of impairment charges. Key input estimates used in the determination of cash flows from oil and gas reserves include: quantities of reserves and future production, forward commodity pricing, development costs, operating costs, royalty obligations, abandonment costs, and discount rates. As at March 31, 2020, if pre-tax discount rates used in the calculation of impairment changed by 1% with all other variables held constant, the recoverable amount of the Montney CGU would change by approximately \$9.4 million. As at March 31, 2020, if commodity price estimates changed by \$1.00/bbl for oil and NGLs and \$0.10/mcf for natural gas with all other variables held constant, the recoverable amount of the Company's CGU would change by approximately \$12.9 million.

## 6. EXPLORATION AND EVALUATION ASSETS

	<b>Total</b>
Balance, December 31, 2018	118,480
Property acquisitions	1,085
Additions	4,522
Impairment	(1,084)
Land lease expiries	(63)
Capitalized share based compensation	42
Balance, December 31, 2019	122,982
Additions	<b>6,230</b>
Transfer to property, plant, and equipment (note 5)	<b>(3,923)</b>
Impairment prior to the transfer to property, plant, and equipment	<b>(2,410)</b>
Transfer to assets held for sale (note 4)	<b>(1,229)</b>
Capitalized share based compensation	<b>9</b>
<b>Balance, March 31, 2020</b>	<b>121,659</b>

Exploration and evaluation assets consist of the Company's exploration projects which are pending the determination of proved or probable reserves. Additions represent the Company's share of costs incurred on exploration and evaluation assets during the period, consisting primarily of undeveloped land and drilling costs until the drilling of the well is complete and the results have been evaluated.

During the three months ended March 31, 2020, \$0.1 million (March 31, 2019 - \$77 thousand) of directly attributable general and administrative costs were capitalized as expenditures on exploration and evaluation assets.

Land lease expiries for the three months ended March 31, 2020 were \$nil (March 31, 2019 - \$63 thousand) and have been included in depletion and depreciation on the statement of operations and comprehensive earnings (loss).

Prior to the transfer of exploration and evaluation assets to PP&E, management completed an impairment assessment and determined an impairment charge of \$2.4 million as the estimated future cash flows from proved and probable reserves were not sufficient to support transferring the carrying amount of all of the costs incurred to PP&E.

## 7. LEASE OBLIGATIONS

Effective January 1, 2019, the Company applied the IFRS 16 accounting policy and recognized its office lease contract as a right-of-use asset. Lease obligations are discounted with an effective interest rate of 5.0% and right-of-use asset is amortized based on the lease term. The Company's office lease expires October 31, 2021 and has no renewal option in the lease agreement.

	<b>Total</b>
Balance, December 31, 2018	-
Liabilities recognized on adoption of IFRS 16	254
Lease payments	(96)
Interest expense	11
Balance, December 31, 2019	169
Lease payments	(24)
Interest expense	1
<b>Balance, March 31, 2020</b>	<b>146</b>
Current	91
Long-term	55
	<b>146</b>

The total undiscounted amount of the estimated future cash flows to settle the lease obligations over the remaining lease term is \$0.1 million. The Company's minimum lease payments are as follows:

	<b>March 31, 2020</b>
Within one year	96
Later than one year but not later than two years	56
Later than two years	-
Minimum lease payments	152
Amount representing interest expense	(6)
Present value of net lease payments	<b>146</b>

## 8. CREDIT FACILITY

The Company has a \$20.0 million revolving operating demand loan credit facility with a Canadian chartered bank. To access the credit facility over \$15.0 million requires entering into and maintaining forward commodity price contracts of no less than 50% of production volumes for the first 12 months and no less than 25% of production volumes for the following 12 months thereafter. The revolving credit facility bears interest at prime plus a range of 0.50% to 2.50% and is secured by a \$100 million fixed and floating charge debenture on the assets of the Company. The undrawn portion of the credit facility is subject to a standby fee in the range of 0.20% to 0.45%. At March 31, 2020, \$1.1 million had been drawn on the revolving credit facility (December 31, 2019 - \$nil). At March 31, 2020, the Company had outstanding letters of guarantee of \$4.8 million which reduce the amount that can be borrowed under the credit facility. The next review of the credit facility by the bank is scheduled on or before May 31, 2020. As the available lending limits are based on the lender's interpretation of the Company's reserves and future commodity prices, there can be no assurance as to the amount of available credit that will be determined at each scheduled review. In the event that the credit facility limit is reduced and the amount outstanding exceeds the new credit facility limit, any shortfall shall become immediately due and payable.

The Company's credit facility includes a covenant requiring the Company to maintain an adjusted working capital ratio of not less than one-to-one. The working capital ratio, as defined by its creditor, is calculated as current assets plus any undrawn amounts available on its credit facility less current liabilities excluding any current portion drawn on the credit facility. The Company was compliant with this covenant at March 31, 2020.

## 9. DECOMMISSIONING OBLIGATIONS

The Company's decommissioning obligations result from its ownership interest in oil and natural gas assets including well sites and gathering systems. The total decommissioning obligation is estimated based on the Company's net ownership interest in all wells and facilities, estimated costs to abandon and reclaim the wells and facilities, and the estimated timing of the costs to be incurred in future periods. The total undiscounted amount of the estimated cash flows (adjusted for inflation at 0.68% per year) required to settle the decommissioning obligations is approximately \$14.7 million (December 31, 2019 - \$17.1 million) which is estimated to be incurred over the next 30 years. At March 31, 2020, a risk-free rate of 1.25% (December 31, 2019 - 1.67%) was used to calculate the net present value of the decommissioning obligations.

	Three Months Ended March 31, 2020	Year Ended December 31, 2019
Balance, beginning of period	12,191	9,572
Provisions incurred	250	65
Provisions settled	(69)	(256)
Property acquisitions	-	1,098
Revisions in estimated cash flows	-	188
Revisions due to change of rates	(916)	1,313
Accretion	50	211
<b>Balance, end of period</b>	<b>11,506</b>	<b>12,191</b>

## 10. SHAREHOLDERS' CAPITAL

The Company is authorized to issue an unlimited number of voting common shares, an unlimited number of non-voting common shares, Class A preferred shares, issuable in series, and Class B preferred shares, issuable in series. No non-voting common shares or preferred shares have been issued.

Voting Common Shares	Number	Amount
<b>Balance, December 31, 2018 and 2019 and March 31, 2020</b>	<b>200,525</b>	<b>288,837</b>

## 11. SHARE BASED COMPENSATION PLANS

### Stock options

The Company has authorized and reserved for issuance 20.1 million common shares under a stock option plan enabling certain officers, directors, employees, and consultants to purchase common shares. The Company will not issue options exceeding 10% of the shares outstanding at the time of the option grants (the performance warrants described below are aggregated with any options for the 10% limit). Under the plan, the exercise price of each option equals the market price of the Company's shares on the date of the grant and an option's maximum term is ten years. At March 31, 2020, 11.0 million options were outstanding at an average exercise price of \$1.24 per share.

	Number of Options	Weighted Average Exercise Price (\$)
Balance, December 31, 2018	11,422	1.25
Forfeited	(266)	1.28
Balance, December 31, 2019	11,156	1.25
Granted	45	0.15
Forfeited	(199)	1.32
<b>Balance, March 31, 2020</b>	<b>11,002</b>	<b>1.24</b>
<b>Exercisable, March 31, 2020</b>	<b>10,124</b>	<b>1.20</b>

The Company accounts for its share based compensation plans using the fair value method. Under this method, compensation cost is charged to earnings over the vesting period for stock options and warrants granted to officers, directors, employees, and consultants with a corresponding increase to contributed surplus.

The fair value of the stock options granted were estimated on the date of grant using the Black-Scholes-Merton option pricing model with the following weighted average assumptions:

	March 31, 2020	December 31, 2019
Risk-free interest rate (%)	0.9	-
Expected life (years)	5.0	-
Expected volatility (%)	55.5	-
Expected dividend yield (%)	-	-
Forfeiture rate (%)	0.4	-
Weighted average fair value of options granted (\$ per option)	0.07	-

During the three months ended March 31, 2020, the Company recognized \$49 thousand (March 31, 2019 - \$0.2 million) of share based compensation related to the stock options. At March 31, 2020, there was \$0.1 million remaining as unrecognized share based compensation related to the stock options.

## Performance Warrants

The Company has 7.2 million performance warrants outstanding to certain officers, directors, employees, and consultants to purchase common shares at an exercise price of \$1.70 expiring on August 15, 2020 that are subject to both time vesting, which has been met, and performance vesting as follows:

	30 day Volume Weighted Average Trading Price of the Common Shares (\$)	Percentage of Warrants Vested
	1.87	20%
	2.04	40%
	2.21	60%
	2.38	80%
	2.55	100%

	Number of Warrants	Exercise Price
Balance, December 31, 2018	7,485	1.70
Forfeited	(170)	1.70
Balance, December 31, 2019	7,315	1.70
Forfeited	(100)	1.70
<b>Balance, March 31, 2020</b>	<b>7,215</b>	<b>1.70</b>
<b>Exercisable, March 31, 2020</b>	<b>4,329</b>	<b>1.70</b>

During the three months ended March 31, 2020, the Company recognized \$nil (March 31, 2019 - \$0.1 million) of share based compensation related to the performance warrants. At March 31, 2020, there was \$nil remaining as unrecognized share based compensation related to the performance warrants.

## Purchase Warrants

The Company has 7.65 million purchase warrants outstanding to certain officers, directors, employees, and consultants to purchase common shares at an exercise price of \$2.04 expiring on September 12, 2020 that are fully vested.

	Number of Warrants	Exercise Price
<b>Balance, December 31, 2018 and 2019 and March 31, 2020</b>	<b>7,650</b>	<b>2.04</b>
<b>Exercisable, March 31, 2020</b>	<b>7,650</b>	<b>2.04</b>

During the three months ended March 31, 2020, the Company recognized \$nil (March 31, 2019 - \$nil) of share based compensation related to the purchase warrants. At March 31, 2020, there was \$nil remaining as unrecognized share based compensation related to the purchase warrants.

## 12. PER SHARE AMOUNTS

The following table summarizes the weighted average number of shares used in the basic and diluted net earnings (loss) per share calculations:

	Three Months Ended March 31	
	2020	2019
Weighted average number of shares - basic	200,525	200,525
Dilutive effect of share based compensation plans	-	414
Weighted average number of shares - diluted	200,525	200,939

For the three months ended March 31, 2020, 11.0 million stock options (March 31, 2019 - 7.2 million), 7.7 million purchase warrants (March 31, 2019 - 7.7 million) and 7.2 million performance warrants (March 31, 2019 - 7.5 million) were anti-dilutive and were not included in the diluted net earnings (loss) per share calculation.

### 13. SUPPLEMENTAL CASH FLOW INFORMATION

	Three Months Ended March 31	
	2020	2019
Restricted cash	(120)	(160)
Accounts receivable	(237)	110
Prepaid expenses and deposits	118	74

### 14. REVENUE

The Company sells its production pursuant to fixed or variable price contracts. The transaction price for variable priced contracts is based on the commodity price, adjusted for quality, location or other factors, whereby each component of the pricing formula can be either fixed or variable, depending on the contract terms. Commodity prices are based on market indices that are determined on a monthly or daily basis. Under the contracts, the Company is required to deliver variable volumes of oil, natural gas liquids or natural gas to the contract counterparty. Revenue is recognized when a unit of production is delivered to the contract counterparty. The amount of revenue recognized is based on the agreed transaction price, whereby any variability in revenue relates specifically to the Company's efforts to transfer production, and therefore the resulting revenue is allocated to the production delivered in the period during which the variability occurs. As a result, none of the variable revenue is considered constrained.

The contracts generally have a term of one year or less, whereby delivery takes place throughout the contract period. Revenues are typically collected on the 25th day of the month following production.

The following table presents the Company's oil and natural gas revenues disaggregated by revenue source:

	Three Months Ended March 31	
	2020	2019
Oil and condensate	2,569	3,008
Other natural gas liquids	493	838
Natural gas	2,729	4,256
Oil and natural gas sales	<b>5,791</b>	<b>8,102</b>

Under certain marketing arrangements the Company will transfer title of its natural gas production to a third-party marketing company who will subsequently redeliver the natural gas production to an end customer by utilizing the Company's pipeline capacity. This portion representing the sale of transportation services is presented within natural gas revenue which is disaggregated in the below table by type:

	Three Months Ended March 31	
	2020	2019
Natural gas production sales	1,402	2,992
Transportation revenue	1,327	1,264
Natural gas sales	<b>2,729</b>	<b>4,256</b>

The following table presents the Company's processing and marketing revenues disaggregated by revenue source:

	Three Months Ended March 31	
	2020	2019
Processing revenue	94	164
Marketing revenue	-	125
Processing and marketing revenue	<b>94</b>	<b>289</b>

The Company's revenue was generated entirely in the province of British Columbia. The majority of revenue resulted from sales whereby the transaction price was based on index prices. Of total oil and natural gas sales, three customers represented combined sales of 99% for the period ended March 31, 2020 (March 31, 2019 – three customers represented combined sales of 98%).

During the three months ended March 31, 2020, the Company realized credits of \$0.1 million (March 31, 2019 - \$0.6 million) to offset royalties otherwise payable. These credits stem from the British Columbia Government's Infrastructure Royalty Credit Program resulting from infrastructure built and wells drilled and tied-into the related infrastructure and the Company currently has \$0.6 million of credits remaining.

## 15. COMMITMENTS

The following is a summary of the Company's contractual obligations and commitments at March 31, 2020:

	2020	2021	2022	2023	2024	Thereafter	Total
Operating leases	168	186	-	-	-	-	354
Firm transportation agreements	7,696	10,055	3,862	3,862	3,219	-	28,694
	7,864	10,241	3,862	3,862	3,219	-	29,048

Transportation commitments include contracts to transport natural gas and NGLs through third-party owned pipeline systems. The Company currently has commitments of 27.0 mmcf/d escalating to 33.3 mmcf/d in November 2020 of firm transportation to deliver natural gas to the Alliance Trading Pool (ATP) through October 31, 2021. The Company has also committed to 14.2 mmcf/d of firm transportation to deliver natural gas to Chicago through October 31, 2024.

Operating leases include the non-lease variable components of the head office lease.

## FORWARD-LOOKING STATEMENTS

This Interim Report may contain forward-looking information that involves a number of risks and uncertainties that could cause actual results to differ materially from those anticipated. For this purpose, any statements herein that are not statements of historical fact may be deemed to be forward-looking statements. Such risks and uncertainties include, but are not limited to: risks associated with the oil and gas industry (e.g. operational risks in exploration, development and production; changes and/or delays in the development of capital assets; uncertainty of reserve estimates; uncertainty of estimates and projections relating to production and costs; commodity price fluctuations; environmental risks; and industry competition).
